WHAT IS IT?

ëQual EnviroCare® is an adjuvant used in rodent control programmes, together with anticoagulant rodenticides, to optimise the overall effectiveness of rodent management programmes and help reduce their bait shyness. It promotes faster feeding cessation and contributes to the reduction of anticoagulant residues in rodent carcasses. This helps to reduce the risk of secondary poisoning in non-target species.

KEY FEATURES

- **Achieve Faster, More Reliable Results**
Optimizes feeding behavior in rodent populations, helping shorten treatment time and improve control consistency.
- **Improve Customer Satisfaction**
Delivers visibly cleaner results with fewer carcass residues and less environmental concern — strengthening your professional reputation.
- **Simplify Field Operations**
Works easily alongside any standard bait station setup; no need for equipment changes or additional handling of baits.
- **Increases bait effectiveness and reduces bait aversion**
Promotes better bait acceptance and reduces waste, helping you get more performance from every gram of product used.
- **Enhance Safety Profile**
Contributes to reduced chemical residues in treated areas, supporting safer conditions for people, pets, and non-target wildlife.
- **Strengthen Compliance and Sustainability**
Designed to meet modern EU standards for environmental responsibility and integrated pest management.
- **Professional Reliability**
Developed specifically for pest management operators who need effective, compliant, and high-performance tools in the field.

Include **adhesivo**
doble cara

DIRECTIONS FOR USE

- **Application Method**
Use in a separate feeder, positioned alongside rodenticide bait stations.
 - Use single Adjuvant feeder (10 mL) per bait station (for 100 g of rodenticide bait placed in the bait station).
 - Position the Adjuvant feeder in a proximity to rodenticide bait inside the bait station only.
 - Refill regularly to maintain availability throughout the treatment period.

TARGET RODENTS

Brown rat (*Rattus norvegicus*),
Black rat (*Rattus rattus*),
House mouse (*Mus musculus*)

USE AREAS

Indoor and outdoor use
(around buildings, industrial
facilities, farms, warehouses,
food storage areas, etc.)

SAFETY & PRECAUTIONS

- Do not mix the product directly with bait unless specifically authorized.
- Avoid release into the environment.
Keep out of reach of children, domestic animals, and non-target wildlife.
Dispose of product and container in accordance with local regulations.
